

# A.S.M.E. Pressure Vessels

BUILT TO U.L.C./CAN-5602-M92

**Built to: A.S.M.E. Section VIII-1 / 6" Diameter and Up**

The Tank Shop, a leader in Eastern Canada in the manufacturing of A.S.M.E., CSA and Det Norske Veritas (D.N.V.) pressure vessels built in carbon or stainless steel.

Our fabrication plant, accredited I.S.O 9001-2000, ensure the highest standard of quality.

**Market served** : Petroleum, Chemical, HVAC and High Pressure Storage

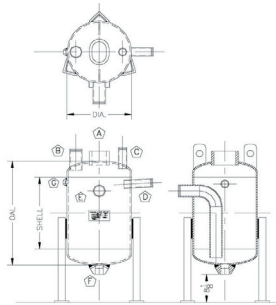

## Manufacturing

The Tank Shop has a team of engineers and technician that will design and manufacture pressure vessels with your specific or custom requirements. No task is too small or too large.

We stock a number of standard approved blowdown tanks ready to ship complete with CRN number.

### Pressure Vessels manufactured:

- Custom build (d.w.p.#15 to #3000)
- Air receivers
- Water storage
- Blowdown tanks
- Expansion tanks
- D.N.V. Offshore p.v.
- Lining/special coating available

**"This high-quality product undergoes a series of tests and is built to last. Proud and dedicated workmanship goes into the fabrication of every tank."**

## Boiler & P.V. Repairs

If you need to have your boiler or pressure vessel maintained or repaired, our certified staff can assess the work to be done and have it repaired in a timely manner.

Our experienced welders can also work in very difficult situations such as circumstances where materials have aged considerably. Our goal is to provide the best quality possible at an affordable cost. Our welding procedures are government approved.
